

**Breakout Session I: Assessing Impacts and Vulnerability**

Tuesday (10:40-12:15)

1. **(15 min) Introductions (please answer the following questions):**
  - a. *Your NAME and ORGANIZATION*
  - b. *Which of the following best describes your role in coastal habitat conservation?*
    - i. Habitat Restoration
    - ii. Habitat Protection – permits/consultations
    - iii. Habitat Protection – acquisitions
    - iv. Resource Management
    - v. Other
  - c. *Which of the following best describes the status of your organization in assessing impacts and vulnerability of coastal habitats to climate change?*
    - i. Not assessing
    - ii. Thinking about it
    - iii. Assessments underway
    - iv. Assessments completed
    - v. Assessments used to shape actions
2. **(20 min) What are the key approaches you are using (or know of) to assess climate impacts and vulnerability of coastal habitats?**  
(Product: summary of key approaches across region)
3. **(20 min) What are the key constraints/needs/gaps in moving forward in assessing impacts and vulnerability of coastal habitats to a changing climate in this region?**  
(Product: list of key constraints/needs for assessing impacts & vulnerability in region)
  - *Data & information constraints (if so, what)?*
  - *Gaps in capacity to assess or use information?*
  - *Gaps in decision support tools or other resources (what kind)?*
  - *Management and/or policy constraints?*
4. **(20 min) What are some specific actions/solutions that could help fill these constraints?**  
(Product: list of specific actions needed to fill the gaps)
5. **(10 min) What are the 3-5 most important points to include in report out?**

**Breakout Session II:**  
**Taking Action To Promote Climate Resilient Habitats**

Tuesday June 22 (3:45 - 5:00 pm)

1. (20 min) **What are the key tools or strategies you are using (or know of) to incorporate climate impacts and vulnerabilities into plans and actions to increase resilience of coastal habitats (= adaptation strategies)?**  
(Product: summary of key approaches across region)
  - Management or policy guidelines?
  - Decision support tools or other resources?
  - Data/information delivery mechanisms?
  
2. (20 min) **What are the key constraints/needs/gaps in developing and implementing strategies to increase resilience and adaptation of coastal habitats to climate change?**  
(Product: list of key constraints/needs in moving forward)
  - *Data & information constraints (if so, what)?*
  - *Gaps in capacity to assess or use information?*
  - *Gaps in decision support tools or other resources (what kind)?*
  - *Management and/or policy constraints?*
  
3. (20 min ) **What are some specific actions/solutions that could help address these constraints?**  
(Product: list of key actions needed to happen to fill these gaps)
  
4. (10 min) **What are the 3-5 most important points to include in report out?**
